DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Feng, U.S. Patent No. 5,421,343 A.

Feng discloses a system for electroencephalography of a patient with brain disease (see col. 3, lines 31-33), including: an EEG acquisition unit (diagnostic center) 4 for use by an AU operator (see fig. 1 below and col. 6, lines 20-26); a network 3 of EEG readers 2 (see col. 6, lines 35-51); and a communications network 3 for facilitating communication between an AU and the EEG readers 2 (see col. 6, lines 35-51).

FIG. 1

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-5, 7, 10, and 11 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 15-22 of prior U.S. Patent No. 6,510,340 B1. This is a double patenting rejection.

Allowable Subject Matter

3. Claims 6, 8, 9, 12, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The following is a statement of reasons for the indication of allowable subject matter:

As to claims 6, 8, 9, 12, and 13, the prior art does not teach a system or method for electroencephalography of a patient in claims 4, 5, 7, 10, and 11, including: limiting access by the AU operator to the parameter storage/database; and a template for placement of EEG electrodes comprising a first, second, and thirds strap as claimed and where the opening in the third strap is positioned approximately 25% of the distance from the first junction toward the second junction.
